SARAH AL-REFAIE

Computer Science Graduate

+966 54 528 2836 | isarahalrefaie@gmail.com | linkedin.com/in/sarah-alrefaie

PROFESSIONAL SUMMARY

Computer Science graduate with a solid foundation in web development, databases, and data analysis. Detail-oriented and organized, with a natural ability to understand how people work and turn their needs into clear, practical solutions. A fast learner who adapts quickly to new tools and environments, communicates confidently in Arabic and English, and works well both independently and within teams. Eager to grow professionally and contribute from day one.

EXPERIENCE

Cooperative Training — IT Department, Yanbu Municipality *4 months*

Graduation project: SMART IT — IT Service Management System | Laravel, PHP, MySQL, Bootstrap

- Designed and developed a full-stack web system for Yanbu Municipality to manage IT support tickets, assets, and maintenance records, replacing manual reporting methods.
- Built role-based access control (RBAC) with 3 user roles and server-side permission enforcement, ensuring secure, role-appropriate access across all features.
- Designed a normalized relational database (7 interconnected tables) using an ERD-first approach, implemented via Laravel Migrations and Eloquent relationships.
- Implemented full bilingual support (Arabic/English) across the UI and dynamic data using Laravel localization.
- Integrated a QR code solution allowing employees to report issues via mobile when their primary device is unavailable.

EDUCATION

Bachelor of Computer Science *2026*

Yanbu Industrial College (YIC) — Yanbu, Saudi Arabia

ACADEMIC PROJECTS

Hotel Reservation System *Laravel, PHP, MySQL, Bootstrap 5*

- Developed a web-based reservation system with RBAC for Admin, Receptionist, and Guest roles, and modules for rooms, reservations, payments, and room images.
- Implemented Arabic-English support with RTL/LTR switching and responsive Bootstrap 5 dashboards and forms.

Winter Wonderland Amusement Park Database System

- Designed and implemented a fully normalized relational database (up to 3NF) from ER diagrams to SQL schema.
- Enforced business rules and data integrity using CHECK constraints and foreign keys.
- Performed complete DDL and DML operations, including structured queries for reporting.

English Word Auto-Correction System

- Built a system that detects misspelled English words and suggests corrections using string-similarity techniques and optimized text processing.

CERTIFICATIONS

- Ethical Hacker — Cisco Networking Academy (Oct 2026)
- Artificial Intelligence Concepts and Advanced Applications — SDAIA
- Fundamentals of Artificial Intelligence — SDAIA
- Full-Stack Web Development using Django — Tuwaiq Academy

SKILLS

Data Analysis: Microsoft Excel, Data Visualization, Basic Statistical Analysis
Databases: SQL, MySQL, Database Design & Normalization
Programming: Python, Java, PHP, JavaScript
Web Development: HTML5, CSS3, Bootstrap, Laravel, Django, RESTful APIs
Languages: Arabic (Native), English (Proficient)
Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Fast Learner

ACTIVITIES

- Member, Google Developer Group (GDG) — 2025–Present
- Participant, Computer Science Project Showcase Day — Yanbu Industrial College, Nov 2025
